

Greenlyte

Who we are:

We are a German direct air capture startup based in Essen, founded in 2022 by two serial entrepreneurs and a seasoned researcher. Our groundbreaking DAC process simultaneously captures CO₂ and produces hydrogen, driving a highly efficient approach to green hydrocarbon production.

Team of 50+
people in 20
months

Backed by world
class investors and
industry partners

3 projects
funded by
public grants

Our technology consists of two main process steps:

1. Absorption:
Filtering ambient air through
our absorbant.

2. Desorption:
Electrolysis with three output
streams as a result: CO₂, H₂, O₂

We are looking for the **BEST TALENTS** to push our boundaries to the next level!

ARE YOU...

... related to: **mechanical, software** or **electrical engineering**?

... willing to **take responsibility from day 1**?

... passionate about **building things from scratch** and iterate at **rapid speed**?

... eager to work in a **high quality international team** with **english** as the company language?

Then kick-start your career at Greenlyte in these positions:

→ **Hardware Engineer**

→ **Automation & Controls Engineer**
